

3C3 - Estimate the answer to a calculation and use inverse operations to check answers

$$491 + 208$$

Which is the best calculation to estimate the answer?

- 500 + 200 400 + 200 49 + 20 493 + 206

$$428 + 62$$

Which is the best calculation to estimate the answer?

- 420 + 70 400 + 0 430 + 60 428 + 61

$$468 - 32$$

Which is the best calculation to estimate the answer?

- 478 - 31 460 - 40 470 - 30 500 - 0

$$781 - 278$$

What is a good estimate of the answer.

- 400 700 500 600

$$83 - 39 = 44$$

Which calculation would you do to check the answer is correct?

- 100 - 44 44 - 39 44 + 39 83 + 44

$$428 - 39 = 389$$

Which calculation would you do to check the answer is correct?

- 389 - 39 428 + 39 389 + 39 1000 - 389
