

Which shape has mirror symmetry and one or more reflex angles?

- C B D A

Which shape is an irregular pentagon that has one or more acute angles?

- D C A B

Which shape has mirror symmetry and some perpendicular sides?

- C D A B

	Regular polygon	Irregular polygon
No lines of symmetry	A	B
1 or more lines of symmetry	C	D

This Carroll Diagram is used for sorting shapes. Which box would you put a parallelogram in?

- C D B A

	No parallel sides	Has pairs of parallel sides
No lines of symmetry	A	B
Has lines of symmetry	C	D

This Carroll Diagram is used for sorting shapes. Which box would you put a scalene triangle in?

- B A C D

Which shape is a quadrilateral that has equal opposite angles and no lines of symmetry?

- Kite Rhombus Trapezium Parallelogram
