

4F1 - Count up and down in hundredths; recognise that hundredths arise when dividing an object by one hundred and dividing tenths by ten.

$$\frac{15}{100}, \frac{16}{100}, \frac{17}{100}, \dots$$

What fraction comes next?

- $\frac{1}{100}$ $\frac{17}{100}$ $\frac{19}{100}$ $\frac{18}{100}$

$$\frac{19}{100}, \frac{18}{100}, \frac{17}{100}, \dots$$

What fraction comes next?

- $\frac{18}{100}$ $\frac{15}{100}$ $\frac{16}{100}$ $\frac{1}{100}$

$$0.4 \div 10$$

Work out.

- 4 40 0.4 0.04

$$9.16, 9.17, 9.18, \dots$$

What number comes next?

$$9.19, 9.18, 9.17, \dots$$

What number comes next?

$$9.05, 9.1, 9.15, \dots$$

What number comes next?
