

Animal Safari!

This project teaches children about the animals that live around the world, how to look after animals and the importance of caring for our local and global environments.

The children will learn that animals need food, water and a safe shelter.

Learn where Africa is and what the similarities and differences are between where we live and Africa.

They will explore various animal habitats and compare the animals that live there with animals in their locality.

Children will learn information about some safari animals such as giraffes, zebra and rhinoceros.

Children will make an animal mask of their choice, choosing the materials to use.

They will compare the ways that animals are similar and different.

Children will reflect upon places that are special in their own lives and find out about places that are holy and important for many Christians and Muslims. Pupils find out about Churches, Mosques and their key features.

Vocabulary

Reptile	Cold-blooded animals that are characterised by their scales and their ability to lay eggs
Mammal	Humans and all other animals that are warm-blooded vertebrates (vertebrates have backbones) with hair.
Bird	Vertebrate animals that have feathers, wings, and beaks.
